Tip You can use a wacom tablet with most tools in Photoshop Elements or Photoshop CS4. The original Photoshop for Mac application originally ran on the pre-standard Mac OS known as System 6 (currently OS X). The interface, though, was quite rudimentary and lacked many advanced editing tools. # Photoshop CS4 Adobe Photoshop CS4 is an image editing application unlike any other. It has advanced tools for every photo editor's favorite functionality, such as greater control over how pixels behave as well as new features that help bring new life to your digital images. Adobe has streamlined and upgraded many aspects of the interface and left other programs in the dust in many respects. The few extras that have been added to Photoshop CS4 are clever touches that simply enhance the end product. ## Learning Photoshop CS4 Basics Photoshop CS4 is similar to its previous versions, both in terms of the interface and the way you work with images in the program. It relies on the same tabbed interface and has the same layered editing system that most people are familiar with. It can be used with your computer's built-in graphics application as well. However, Photoshop CS4 takes advantage of the graphics card in your computer to enhance image editing (Figure 11-9). Whether you're using an external graphics card or your built-in graphics card, you can open Photoshop CS4 using either your computer's external monitor or your computer's built-in monitor. Adobe has made a couple of subtle and useful enhancements to CS4 over previous versions. First, the three _Tools_ buttons on the top toolbar are now larger, so you can reach them more easily. You can also resize them any way you like, and you can hide or show them. The new feature is even more useful than it sounds—instead of only showing you the Tools for the last tool you used, Photoshop CS4 displays the Tools buttons for any tool you have open. There are two new buttons under the Tools menu at the top of the workspace called _Quick Selection_ and _Quick Fill_.

Q: Is "Come now, friends, the day of Ahaz has arrived" (Daniel 11:21) correct Aramaic? From the Greek Septuagint (1 Timothy 4:7, Daniel 7:12, and others), the phrase in question is: Daniel 11:21 in the Greek Septuagint: ἐπὶ ἡμῶν δὲ τὰ ξὲν ἡμῖν ἐλθὲ The same phrase is found in the Greek text of Daniel 7:13, Daniel 10:11, etc. The Greek text of Daniel 11:21 seems to be from the translation of the Septuagint: The Greek is: δάναμίς ῦπο κρατίστω ἀπὸ ἡμῶν οὕτως ἐναργεῖ Notice what it looks like for Daniel 11:21 to have the same text in Daniel 7:13 and 10:11: Daniel 7:13: κρατίστω ἀπὸ ἡμῶν οὕτως ἐναργεῖ Daniel 10:11: κρατίστω ἀπὸ ἡμῶν οὕτως ἐναργεῖ This means that the translation of the Septuagint of Daniel 11:21 is quoted (or is a later text) in these verses, as well. The Syriac Targum of Daniel 11:21 seems to be from the Aramaic Targum, namely, ܐܙܘ ἐπὶ ἡμῶν δὲ τὰ ξὲν ἡμῖν ἐλθὲ This refers to the Tetragrammaton rather than Yahweh, as one might expect given the Hebrew text of Daniel 11:21, a man from the south, from the land of Kedar who destroyed However,
