This work used the landslides triggered by the 2017 Ms7.0 Jiuzhaigou, China. Yi, G.X.; Wen, X.Z.; Xu, X.W. Study on recurrence behaviors of strong. Q: Why were Malthus's theories denied in their time? I've read and heard about Thomas Malthus' theories, and I'm curious about the idea that was denied at the time. I know that Malthus argued that, since the population was an exponential function of the food supply, and that everyone would always do more than their fair share of that food supply, there would always be starvation and misery. Then what was the argument against it? I don't mean that they denied that an exponential growth would lead to a crash because people would starve, I mean that people who believe the laws of mathematics have proven that eventually there will be a crash disagree with that. Which really was the point of the works of Smith, Ricardo, and Malthus? Was it because they felt all the predictions weren't valid? Or was it just because they didn't agree with Malthus's viewpoint that the point of famine was more for the fertility to be curtailed? A: Malthus was incredibly prescient, but he was not totally correct. Yes, there were lots of famines; yes
