We appreciate the effort made by all the different people involved in the development of the game (authors, programmers, designers, artists, distributors, etc.). Thank you for supporting this project, and I hope you'll join me in enjoying it. Labyrinth: The War on Terror is a game, built by geeks for geeks. It has no artificial inflation (money for a particular actor) and is free of manipulation. It is a game created to promote debate and discussion and explore a world that most people tend to ignore or look away from, the world of militant Islamist organizations. It is built on historical facts that we have learnt over the last decade (9/11, the Iraq war and the War on Terror). The game model is designed to stimulate meaningful discussion rather than spread lies or misinformation. Labyrinth: The War on Terror is a game that aims to educate players about the global war on terror and to convey the information of political events in a clear way. Its target audience is international audiences from all over the world, especially to the Muslim diaspora. In the game, players must take on the role of the US, the Muslim world or both. Players have to make long and short term decisions regarding its various participants (i.e. player versus player characters). Each decision will lead to the evolution of the conflict and its outcomes. In addition, players are able to create their own unique sets of objectives through the use of the game's cards. At the end of each round of the game, players are shown the combined outcome of all cards and the overall progression of the conflict. This is because the game, unlike others, puts the responsibility of its players in the center. It is for them to analyze and judge the situation in the environment that they have created. Players who are against the US will always have a way to go against the US. For those who are in favor of the US, they can still make their own choices and consequences, which ultimately bring more realism and can be seen in their final game score. The primary objective of the game is to win. The player will win the game if his or her last round score is higher than the opponents. It is to this end that the game does not allow players to create any other units aside from the American President and those of the militant Islamists. In this manner, players can only win by creating and playing the American President and those of the militant Islamic groups. The game allows players to customize their challenges to their own desires

## **What's new in Labyrinth: The War On Terror:**

**is a ground-breaking new film that addresses an inconvenient truth about our time: many prominent stories in the news right now come from foreign conflicts. If there's one thing the media circus surrounding the bombing of the Syrian regime's military chemical weapons site is proving, it's that we're all sick of bombing each other. And yet "the war on terror" is still considered the essential framing for most U.S. foreign policy. The movie Labyrinth is a limited theatrical release this month, but its story is one of trauma, loss, and redemption. The cinematic experience is broken down into thirds: first, there's the linear narrative, and second, there's the act of discovery. Filmmaker Jim Sheridan takes us through the aftermath of a complex secret operation intended to decimate an enemy. He reveals the identity of the masterminds, but in doing so, he also uncovers "the terrible truth." But before he can even hint at its existence, Sheridan's movie becomes "the subject of a strange debate." "Why did they do it?" the congressional committee asks. "Why did they kill our boys?" Sheridan answers: "So we all have time to listen to this story that we have to tell, that has happened in our country." With truth and "liberty" at stake, the story is never fully told. But a new understanding of the original events is derived through the filtered experience of the search, and then the redemption of those lost. Although I've only seen the movie once, its central conceit has deeply resonated with me on multiple levels. Labyrinth: The War on Terror is a movie about a tragic moment in time—the lead-up and aftermath of a clandestine operation that engineered terror upon a whole beleaguered people. But unlike most films of its ilk, it's a mysterious, dark movie about the horrors of war—from the halls of Hollywood to the secret corridors of Washington DC.
