I am trying to dump any statement including dbms\_output and dynamic sql statements to a file. I can't find any examples of how to do that, though I have tried searching. Any help would be appreciated. Thanks! A: If you are using the 12c version of the OCI runtime library the following command line switches for OCI\_Trap will do what you want: -e, --enablerm --enable\_error\_on\_exception (default)

---

--enable\_event\_on\_exception -m,  
--mode=mixed --mode\_any -M,  
--mode\_any\_requested --mode\_any\_requested  
-P, --prevent\_parsing (default)  
--prevent\_parsing -q, --quiet
