Hitman: Blood Money Features Key:

- **Unparalleled Spin Control:** Multiple system solutions for the predictive, dynamic action of the ball on the racquet.
- **Dual-plane Swing Technology:** A standard and uniquely advanced, single-motor swing technology that's both simple and elegant.
- **Multi-playability:** The Curley Lab System offers many different aspects to experiment with, including:
- **Artificial or real racquets:** Pick your racquet today and stick with it!
- **Tennis power and multi-purpose shock absorption:** Although it was developed for tennis, the Curley Lab System is also effective when hitting the ball using a ping-pong paddle or baseball bat. Experiments with multiple impact locations have been conducted.
- **Extreme spring softness:** The Curley Lab System strings are created using a proprietary method of creating much softer springs (series 1) than those you're used to when playing with other tennis lab systems (series 100).
- **Strings to fit almost any standard:** Per the Curley Laboratory principle, the Curley Lab System will "string you to your ideal positions or configurations."
- **A minimum of 6 years of warranty:** Even if you decide later that you don't like the way the ball feels when you play with them, you can still make your original order purchase.
- **A 25% discount on all new Curley Laboratory Lab System B Series Strings:** Place an order and receive 25% off of future orders. Hurry! This limited time offer ends December 31, 2001.

Connect the Dots is a special English edition of the Japanese

manga series Detective Conan. The first English edition was released in English on 11 June 2008. Story Clerk, the co-founder of the "Conan Killer" task force which studied the cases of all the PM kills, was once a reclusive and mildly mad scientist in his early teens. It was Shinichi Kudo, however, who saved him. He took on the responsibilities of bringing Conan once more to justice, and in doing so, he was forced to find out what exactly Shinichi was. He threw it into reverse, and became immortal. But the end result was that there was no Shinichi any longer, and he was forced to put up a facade of a high-ranking official. One day, the 15-year-old Shinichi, alongside his daughter Shinobu, rapped him down that he was making the wrong moves, and finished by asking where Shinichi was. This worried him, and so he went back up. He used every method of testing which he could think of - cigarettes, blades, matches, anything which might cause a shock. He double-checked everything - always taking a shower as soon as the shock was given, until he was able to kill 500 times in a few months, surviving. Even after this, he resumed his true self somewhat, returning to his covert lab in the woods. One morning, however, Shinichi went into the lab, and found his lab mixed up; the vials all mixed up and the needles all mixed up. When all of them were arranged in the "correct" order, the paint was red, and the same color was on the floor. On a closer inspection, he found that someone had done everything in the "wrong" order. He began to ask himself if there was any way it could have been altered, and thought back to a time when a Death's Head soldier came to him. A young Shinichi told him about the crimes Shinobu, who'd turned into a puppet of the Entercard, had committed. The Death's Head soldier was not so sure if this was genuine, but agreed to look into it. He contacted the other branches of Entercard, and eventually found out that Shinobu had committed the 569th murder. The Death's Head soldier went to confirm the case at Shinichi's lab, and then returned to head for Death's Head HQs. There, he accused Shinobu of being an Enter

Cathood Party is an interactive fiction story. The game takes place in the world of Aeryon, a retrofuturistic, post-apocalyptic sci-fi setting. The main character of the story is called Dylan and he lives on an ostrova Koshki, a small island. There are two other persons in the world: Sarah and Zach. They play music and have a band called the Scream Popstars. We would like to introduce a new protagonist in the story called the Boy. He is a 14-year old boy. He is very lonely. Everyone leaves him alone. His only companion is the Witch. She is a very strange creature, a pale young woman with no face. The Boy must join forces with the Witch and go back to the cave and change its destiny. You can start the game by clicking on the icon and watching the video. About the game: The game features many different narratives in the shape of visual novels. The player's interaction with these narratives is performed by clicking on elements of the game interface. Every narrative is different. They are all connected through a common storyline, but they can be played independently of one another. The game is made in the Torque 3D engine. Game Features: 12 Visual Novels An original story Games with unique, single play mode gameplay Different characters Different narratives Each one of the stories is different A huge amount of the content is interactive A short and epic story Features a very complex and interesting storyline Interactive video Lifelike soundtrack The visual novel plays in your browser The Bad Despite all the praise of the game it's obvious that the game is an 8 years old work that was made with an outdated engine. The game was made in the early 2009 (Torque 3D) and it was built with Adobe Flash, as you can see in the video. The game is over 10 years old. Unfortunately, the players might be used to a different interface. In the game there are hints, but for those who don't know the game, they can be misleading. A lot of the engine's features are not supported in the browser and are not even made in html5. In order to make the best use of the game for the players, we need to include the most important features in the game in HTML5. This can take a long time. The Good The game has a
