Anonymous August 25, 2018 The Google translator has way too much work to translate between Japanese and English on a regular basis. It's supposed to be a "one stop shop" for all languages. Well it's not. PALMENARESAugust 25, 2018 Spot on. johnnyJuly 28, 2018 A phone and a controller make a great combo for playing games, but controller based games are still limited to button mashing, such a practice is not viable for more advanced games. I would love a game where I could hold the controller sideways with my fingers on the opposite sides of the controller. Along with that a game that is more 3rd person would be great. I am not saying the clap chop game style is bad but I want more of a feeling like I am a character with a sword. At least a fighting game of some kind, that would be more enjoyable than what I have at my disposal. I have a cheap PSP with a game pad that would turn that idea into an actual reality and it would be a lot of fun. DavideJuly 25, 2018 Hey, I have an idea. But not for the iOS or for the Android, but on the PC. Imagine a game where you are given a target (which can be a weapon to stab or touch the ground to destroy it, or a monster to run from). You are allowed to arm yourself with a sword in a melee combat, but you can also use magic, and there are these small pools of energy that you can apply on yourself, let me explain: You have a certain amount of energy to regenerate, and each pool you can spend on yourself for one time. If you spend one pool, you cannot use your sword, your magic or your shield, but you can move, re-charge or cast your magic, but if you are not near one of the pools, you can rest a while. It's like, you can use your sword, but your defense is lowered a bit, like a small protection

For the first time on the Nintendo DS, four players can battle in widescreen glory. Create your own custom rules and customize your characters and game board in this fast-paced, strategic action game. The world reacts to your playing music? 4 players can battle in wide screen glory? Create your own custom rules and customize your characters and game board? * What's New in this version: - Hone your battle tactics and show off your own style with new music tracks, game modes, and available characters! - Make your DS go ballistic with the new Magnetic Rumble feature! - Compete in extra modes with customizable community rules! - Fix the command crashing bug. - Improve the performance so it won't slow down when playing this gem! * Improve the readme I can't believe Nintendo hasn't put this song in any of their other games yet. Its one of the greatest songs of all time! It just amazes me how Nintendo doesn't include it more often. Here's the audio from the video... I don't care if it doesn't support DSi... But that music is awesome. I can't stop listening to it... @Playing games-music games is a pheasant, to play games with music is the greatest pleasure in life. Got my DL copy of this today. It is very nostalgic, the game is the same great, but it does have some problems. *1) Not an original soundtrack, it is from the song "Casshern Dream" from the game "Devil May Cry 2" by Capcom. *2) it needs some sound effects, you can't tell what's happening, most of the noises are just default, but don't have any instruments that play when the characters die. *3) It needs more skill, you have to aim well if you want to kill your opponent. You can't just run around and randomly smash them. *4) Another complaint of mine, has something to do with the designs of the character cards, some of the characters are dark red, or black, and some of them are bright yellow. For reasons unknown to me, they're supposed to be in black and red, but all the cards are bright yellow. Some of the cards look like they have been printed on the wrong side, but they're just designed differently to the rest of them. *5) The backgrounds are also bright yellow, making them look c9d1549cdd

The Rogue Wizard is a level 9 Rogue/Bard spellcaster. This class excels at hit-and-run tactics with light and heavy magical attacks. It offers more options to power game mechanics than what rogues were offering previously, like using an extremely customizable weapon set to match different playstyles, and by letting players switch between attack modes and spells for each ability. Rogue Wizards are the most versatile magic users, in a world of incredible versatility with the creation of sorceries. At level 1, you learn: Cunning Sneak, Perfect Unarmed Strike, Deft Strike, Evasion, Sharpshooter, Unerring Precision, Sneak Attack, and Swift Attack. Favorite Supernova Star. You never get to see the whole face of the supernova, only small fragments, visible for a brief second when it explodes. And it's because the time available is extremely short, no more than a second for a supernova as luminous as that one. Unfortunately for you, the star that you saw in its final seconds was close to its absolute center. As a result, the shockwave that will surely explode in our skies in a few weeks will compress space, forcing the expansion to collapse. You can see a small version of the star in the 'WCS' pane on the bottom-right. From that point you can: Modify the heading to find out which direction the burst should shoot in (in degrees, anticlockwise from North). Modify the direction of the burst using the small black arrows that are displayed on the right of the heading. Modify the strength of the burst using the green and red 'Lives' and 'Fails' indicators. You also can use the 3 'Gear' options to resize the star, make it rotate around its axis, and modify its apparent temperature to make it more or less luminous. You can also change the color of the core to a good approximation of its intrinsic color. You can use the star in combat with a sneak attack (the star's life is linked to your health). This is really effective for enemies wearing light or no armor, but the amount of damage it does depends on the type of attack you use (bashing, thrusting, slashing, shooting, etc.),

the distance between you and the target, the direction of the attack, and your Dexterity modifier. It is also significantly influenced by the physical condition of the target. Finally, you can find up to 4 enemies, kill them, and use their remains as fuel to heal yourself or

What's new:

, the latest addition to Cry for Dawn's fantastic collectible series, is a lofty challenge if you're planning on craftily organizing groups of zombie heads for your costume or Halloween party. Every mini-puzzle provides a whole group of zombie heads to glue onto your collection, and they aren't easy to get. Let's get to the details of our review, and find out if this may give your days of the dead a bit more kick this Halloween. Continue reading to see what we thought about this newest Cry for Dawn Day of the Dead Pack, and learn if this small DIY collectible puzzle measure up. As with all the Cry for Dawn Day of the Dead collectibles from back in 2015, the latest sticker pack is beautifully constructed, and makes the original Day of the Dead Pack look nothing like new. Each puzzle consists of 60 stickers, each is roughly three inches across, but only one will contain the correct zombie head. Getting all 60 correct is the challenge, as these look just like a whole bunch of random zombified faces. Returning for this latest Day of the Dead puzzle pack is the original puzzle elements from Cry for Dawn's first set, 2013, as well as what appears to be a tiny pond of ooze. Each puzzle is 14 mm (1/2 inch) thick, which makes them slightly thicker than the 2013 puzzles. Although that may not seem like a substantial change, it puts this set at the same thickness of the original Day of the Dead puzzle pack, and it also is the largest sticker pack ever included in the Cry for Dawn Day of the Dead puzzle pack series. Although it is slightly taller than the 2013 Day of the Dead pack, a 140 mm tall puzzle pack with all the correct zombie heads can look a bit overwhelming, so I really like how the sticker sheets are actually slightly tilted so it's more manageable to work with. If you're looking to add a level of tactical challenge to your Halloween events, then this newest Day of the Dead puzzle pack may just be what you've been looking

for. Cry for Dawn Day of the Dead Pack Sticker Pack Review The pack comes with 60 stickers. Since there is no written reference to how many puzzles there are, I had to count them and found that there are a total of 14 sticker sheets in the pack. Each sticker sheet has 60 stickers, and every sticker is a different zombie face. The pack includes all of the facial features

Sunday, July 18, 2015 Triage - Zombie Doctors When it comes to emergencies, you have an immediate response system called Triage. Nb stands for Not BC (before conditions) and Nb after conditions. The first thing you do when an emergency arrives is to evaluate the situation so you know WHAT you need to treat

and HOW you need to treat the patient. Ultimately, Triage is what decides whether your patient will survive. Triage is easy to do if you think like the Zombie Doctors, the evil doctors in Resident Evil. In Resident Evil, there are three categories patients can be categorized into. RUN. RUN is self-explanatory. Somebody that needs to go anywhere and can't or has to. Unless there is a doctor in the chest room with them, RUN. Run to a bug out location in your home or car or make a run for it as far as you can. They will inevitably escape if you stay here and follow the rules. JUMP. JUMP is the next. Define "jump", or "fall
