An age-old battle between those under the light and those under the darkness has raged for centuries. In this world, where the balance of power is shattered, an Elden Lord emerges to command an army. You, a Tarnished (turned from a pure-hearted human), are a young Elden Lord who embarks on a journey to unite your kingdom, become stronger, and bring light to the Elden Lord. You enter a world where two fundamental forces, light and dark, are at war. To complete your quest, you need to save your kingdom, search for a legendary weapon, and face off against other players. Along the way, you will be confronted by many different foes and encounter a huge variety of situations. On your journey, you will choose one of four Elden Lords, each with their own story. The two lords that will define your destiny will appear and disappear depending on your choices. There is a reason why you were born. The choices that you make will determine your fate. ►►► NEW FEATURE ►►►► • In-game Accelerometer Gyroscopic control is another optional function. In an ideal world, Japan would be a net exporter of cars. But since it isn't, it instead has spent the past quarter-century obsessed with trying to stem the tide of its booming car market by de-emphasizing the country's cultural love for the internal combustion engine. So despite its love affair with small-car safety, crumple zones and hybrid technology, Japan has fallen behind in top-end consumer-car sales to countries like France, Norway and Italy. This hasn't prevented automakers and politicians from doggedly pursuing policies aimed at boosting production and revving up exports since the nation's smash-and-grab car-market crash of 1989-90. Now, as new government regulations are being prepared to make Japan the first major signatory of the European Union's strict new emissions rules, the country's car industry is again on the cusp of a new upswing. "The last two years on (weak) demand is behind us," said Naoto Matsuura, sales director at Honda Motor Co. "We are expecting good sales in the new fiscal year starting April 1." The rise of small cars is evident around the shop floors of Honda's R&D and manufacturing plants in west-central Japan.
