2010, AutoCAD 2013, AutoCAD 2014, AutoCAD 2015, AutoCAD 2016, AutoCAD 2017, AutoCAD 2018, and AutoCAD 2019. The most recent version of AutoCAD is currently named the "Software as a Service" or SaaS version of AutoCAD, meaning that the program is no longer run from the hard drive

the first CAD program to support both two-dimensional and three-dimensional (3D) modeling and two-dimensional drafting. The "AutoCAD LT" (Low-Cost AutoCAD) version was designed to enable small-to-medium sized enterprises, or SMEs, to use CAD software for the first time. It was first

released in June 1983 and a subset of the AutoCAD LT source code was released in the public domain in January 2014. Autodesk, as of 2011, had sold over 8 million copies of AutoCAD, compared to over 20 million units of AutoCAD LT. AutoCAD LT had a BASIC-like programming language

called AutoCAD Basic that could be used to create features in the CAD application.

However, Autodesk did not intend for the BASIC language to be used by professional CAD users.

AutoCAD LT offered drawing and modeling in 2D and 3D and included the ability to perform basic modeling tasks

such as defining surfaces, volumes, 2D and 3D objects, converting and translating, importing and exporting files, and laying out a project. It also included
