The new mechanic has been added to several new Player Skills which allow players to perform nearly limitless combinations of actions and instantly draw on data from the HyperMotion engine to produce refined animations, including one-on-one dribbles, pouncing on loose balls, smashing opponents and more. Players can unlock new Skill Combos through gameplay, or by purchasing Skill Cards via the FIFA Ultimate Team app and in the FIFA Mobile game. “With HyperMotion Technology, we’re creating new ways for players to exhibit their technical, tactical and attacking abilities. Players are now able to control the flow of the game on the pitch, and it’s almost like they’re taking on new players,” said Adam Bohr, Head of Sports Simulation at EA SPORTS. “Players can dictate the rhythm and pace of the match by creating new Skill Combos and attributes, and by attacking or defending as their role demands.” Developed by Reflections, the HyperMotion engine has been used in several high profile games including Call of Duty: Infinite Warfare, Destiny and Star Wars: Battlefront 2.

“We put ourselves in the shoes of 22 players, and we analysed what they were doing to take their skills to a new level. So it’s not simply about creating a better simulation – we’re taking what they’re already doing and changing it into something that is more dynamic and exciting,” said Chris Melissinos, Head of FIFA Sport Simulation at Reflections. The introduction of HyperMotion Technology has also been showcased by the introduction of new Skills including the new Power Take-Over system, where players can take and retain possession with an overhead kick. You can see the Power Take-Over in action in the video below. The Power Take-Over allows players to score by taking possession of the ball, with an overhead kick. Power Take-Overs can be directed against defenders and strikers alike. The Power Take-Over allows players to take on defenders and strikers alike. The Power Take-Over is a quick, powerful ability that utilizes the top center of the pitch, so players need to be able to accurately judge where the ball will roll. “The Power Take-Over is a very important part of FUT – it's where you really get an advantage over the opposition. People say we're limiting your gameplay, but with the Power Take-Over you can take on and create better angles for headers,
