If you would like to receive further support, please do not hesitate to contact our technical support team by going to Fantastic isn't it? We need more leaders like him, he could teach the world to be more peaceful. Nouveau [2004]'Steve Jobs: The man who shook the PC industry' [Interesting that it's available as a book, and NOT as an eBook - Ed] "the Industrial Revolution was underway. The growing demand for homes and for new transportation modes meant the threat of more rapid obsolescence; the technology industry was being born. Steve Jobs was a brilliant leader in that first wave of companies. Indeed, he was so skillful, so innovative, and so audacious that his name today symbolizes the future of information technology. For Jobs single-handedly created the personal computer and the computer industry. He

also revolutionized the music industry, the phone industry, and the movies. Steve Jobs died young, and his passing has triggered a wave of nostalgia for a certain period in the history of technology. " - Robert Levering Nineteen-forty was a decade of wild invention. Everyone in Silicon Valley had an idea that they knew would be big. Now all they needed was a working model and some money to make it happen. The kind of guy who could do that was Steve Jobs. Because the computers they needed wouldn't be like any you'd seen before. There would be no "beginning of a new age" or "greatest period of peace on Earth." Rather there would be a rat race. The world's best and brightest would be competing against one another. They were entering a new form of economic competition. All the top companies in the Valley would be based on one idea.They would be founded on the basic principle that "a computer on every desk and in every home." That's what Jobs believed. He'd even fund the first one. He spent his own money to

make it happen. - From 'The man who shook the PC industry'. 6d1f23a050
