Nicotra fans and fan selection software, Nicotra venti software, the Ricardo Salgado made the decision to join the Bitcoin Foundation at a time when the media, skeptics, and even some of his employees were questioning whether or not he should be the group's new president. With five years experience working in telecommunications, the President and CEO of Banco Portugues dos Comerciantes has been leading Portugal's central bank for the past seven years, and was personally selected by former Prime Minister Fernando Lopez to replace Central Bank Chairman, Jose Pinto Ribeiro, in October 2011. In addition to being a long-time Bitcoin enthusiast, Ricardo Salgado has also served as the board of the European Central Bank's Examine Bank Banca e Crediteiro. Salgado answered a few questions from Longflash prior to being elected as the President of the Bitcoin Foundation. The "pulling out of four other nominees" was Salgado's primary concern when making the decision to sign up to be a candidate for the new position. Longflash: Your company, EPC, is one of the founding members of the Bitcoin Foundation. Does your experience as an operator of Bitcoin businesses mean that you have a unique perspective on working within the foundation? Ricardo Salgado: My experience as a founder of some of the first Bitcoin exchanges in Europe, which is also the country with the biggest Bitcoin market, including the first

magnetic field energy density w_B can also be expressed in terms of the Hubble parameter H

[@Hodzas:2015zaa]:
$$w_B \approx (\text{term}) H^2$$
 Inserting the numerical values we find
$$w_B \approx (-7.99 \cdot 10^{-4} - 9.19 \cdot 10^{-5} + \frac{0.5384}{N}) H^2$$
 Clearly, the dark energy equation of state parameter given by equation may be driven to a negative value for certain values of N . However, when the gauge parameter is close to $\eta = 10$, the coupling becomes small and the effect of the extra dimensions is suppressed. For example, if we take the gauge parameter to be $\eta = 9$ and the extra dimensions N to be $N = 1$, $N = 2$ and $N = 3$, we find the following numerical values for the dark energy equation of state parameter
$$w_{B,1} = \frac{0.000023 - 0.000037}{H^2}, w_{B,2} = \frac{0.000043 - 0.000063}{H^2}, w_{B,3} = \frac{0.000074 - 0.000144}{H^2}$$
 In view of this, we note that the present model may provide us with a cosmologically viable setup if the extra dimensions are large. This is clear from the plots presented in figure [6d1f23a050
