EA Sports released a beta of the next installment of its FIFA football game, and also the first year FIFA now functions on the new Frostbite Engine. The Frostbite Engine was supposed to offer increased ball control, improved visuals, FIFA has lost weight and an impetus which it has never regained from FIFA 14. One of the elements FIFA was let down by the Frostbite Engine is its handling of open game play. You can see exactly what your players would like to do, however, the older game merely goes with the flow. 5ec8ef588b
